Amendments to the Specification

Please replace the Abstract of the disclosure on page 30 with the following amended Abstract:

—A graphical user interface with a selection menu having an inherent color key implemented therein is presented. The selection menu displays selectable menu items each associated with different characteristics of possible elements to be displayed in an image rendering space of the display screen. Each menu item is associated with a different unique rendering color. Upon selection of one or more of the menu items, the elements possessing the characteristics associated with the selected menu items are rendered using the different unique rendering color of its associated menu item.—
